Before the Listing Closes

Student quick-start guide

Open For Class · Plan about 45 minutes

---

1 Start with Maya’s search

Compare the prices, the trips and the time left. The game gives you all the case details and data you need.

2 Write and save five answers

Use a detail from the case in each answer. The word minimums are **30, 50, 45, 60 and 45** in order. Type or dictate in the game, then choose **Save answer to report**. You can paste text copied from that same answer.

3 Pause or change devices

Choose **Save & pause**. Use **Resume Class** in the same browser. To change devices, choose **Backup** and keep the .json file. On the other device, open the start screen and choose **Restore progress**.

4 Submit your PDF

At the debrief, enter your name. Choose **Open completed report**, then **Print or save as PDF**. Check that the PDF has your name, all five answers and the last page. Upload it to Canvas and check for confirmation.

The file you submit is the Class report PDF. Keep the .json file to resume play.
